We believe we have what you want. See our Prices.

I. G. PRESTAGE & SONS

Seedsmen - Nurserymen - Florists ALLEGAN, MICHIGAN

Offer you a Common-Sense Catalogue with Reasonable Prices.

A FEW SINCERE WORDS

T O all of our friends and customers this may seem a small and unworthy salesmau; but let us say to all to whom this price list may come: You can compare our catalogue and prices, but we prefer you to compare our stock. It is of the same standard you have always had from us, and, though the crop of plants is short this year, the quality is up to the standard. It is true our catalogue is not overdrawn, but as brief as possible, to save paper, time, and space, but it will tell you reasonably well just what we have to sell.

We appreciate the increase of business, friends, and customers that each year has given us, and trust that we may merit a continuance of your patronage, the same as in the past, for our plants and treatment must please you.

We hope to be favored with a part or all of your order.

J. G. PRESTAGE & SONS

Very truly yours, J. G. PRESTAGE & SONS

A FEW HINTS

Prepare your ground for your plants. When they arrive, set them immediately. If impossible to do this, heel them in damp earth by cutting the bands around each bundle and covering with earth up to the crown of each plant, so that the roots come in contact with the dirt.

Varieties of Strawberries marked (P Varieties of Strawberries marked (P) are pistillate, or imperfect, blossoms and need be set near (five to fifteen feet) to some variety marked (S.) which has staminate or perfect blossoms. The staninate varieties have pollen to spare, and thus pollenize the imperfect blossoms and insure a good crop. Varieties marked insure a good crop. Varieties marked (S.) need not have (P.) varieties near them, but (P.) varieties must be pollenized by staminates.

Shipment—The general way of shipping plants and trees is by express. The rate is one fifth cheaper on plants than other articles. Purchaser pays all express charges, Parcels post is very convenient for those who live out of town, but on large shipments requiring more than one package the cost is more because of a tesparate rate for each package instead of a lot shipment.

Many firms are trying to entice trade by offering to pay all transportation charges, both post and express. It is our candid opinion that this practice is a very unfair one, specially for all customers living within the first four zones on both express and post. The near customer pays the same price as the far one. Thus the far customer gots high transportation charges paid for the long distance, which really makes his stock cost very much less accordingly, while the near customer pays the same whose transportation charge is less, a half less or even more, so that the net cost we the near customer is one hird to one half the transportation charges more; in other the transportation charges more; in other words, the near customer helps pay the higher charges of distant transportation. It is a bit unfair, so we say customer

pays all post and express chares. On parcel post we pay or allow 10c on everyorder and send the order collect. Thus we prepay for you and you can return the amount of charges to us. The 10c we allow on each order pays for return charges. This is on post alone, because all postage must be prepaid. By this system there is no unfairness nor studying nor guessing at rates, zones, etc. It is safest cheapest, and the least trouble. Claims Will Not be allowed unless made within five days after receiving plauts or trees.

Substituting—We do not aim to support or the support of pays all post and express chares. On par-cel post we pay or allow 10c on every

made within five days after receiving plants or trees.

Substituting—We do not aim to substitute withou your permission. So please state second choice when you order, or tell us whether we should substitute. When the matter is not mentioned with your order we construe that as giving consent for us to substitute. Many times we will over-sell on some kinds and have a bountiful supply of other varieties. Usually there are several varieties that are very much alike, where one kinds and have a bountiful supply of other varieties. Usually there are several varieties that are very much alike, where one kinds and can be used equally well as another. Again, some other seeson may see conditions and demands macelly reverses. So, try as hard as we may, we can not always plant or grow or contract for exactly the demands, specially where our plans are laid one year in advance. We try to the utmost to please all of our customers, and usually succeed in highly pleasing ninety-nine per cent, of them.

We Specialize on Strawberry Plants and

We Specialize on Strawberry Plants and Grapevies

Grapevies

Our Frices are not the lowest but are es low as we can carefully grow, dig. and pack right. We know of dozens of firms that are buying practically all the plants and trees they can handle—buy anywhere of any one, as cheap as they can, the cheaper the better, so they can sell cheap. The real values of plants and trees and sbrubs are usually determined by about what you pay for them, and it is always the surest that the best are the cheapest, no matter what they cost.

Another Thing—Many people judge a

no matter what they cost.

Another Thing—Many people judge a firm by the bombast, smooth flattery of themselves, red pictures, and expensive catalogues. Our experience tells us, and we can prove that we are right, that those people are raising very little that they advertise and offer for sale. We are Farmers—Nurserymen—Growers, work in the fields and grow our story during spring, summer, and autumn. We plant, cultivate, fertilize, dig. grade, and pack your orders. We know just what we sell you we sell you.

STRAWBERRY PLANTS

STRAWBERRY PLANTS

We are growing and listing only the best varieties. It is a waste of time and money to bother with those of less value.

Premier (S.)—Premier is now recognized as the peer of early berries by leading growers over the country. In fact we have found it so far sperior to any other variety that we have discarded all other early kinds and are offering only the Premier to our trade. This superiority of the fact that the Premier is by several days the earliest ripening berry now grown and possesses none of the on-

jectionable features of other early va rieties such as poor color, green tipe.
small size, poor flavor and freezing or

Small size, poor havor and freezing of blossoms.

The blossoms of the Premier are so nearly frost proof that the danger or freezing is negligible. We have known Premier to withstand frosts that young entirely ruin the later varieties. The vines bear an enormous crop of large, uniform sized berries, while the berry is bright red clear to the center, is perfect in shape, and ripens without green tips. The fruit presents a very pleasing appearance ou the market and possesses a flavor equal to the later varieties, which is very unusual in an early berry. Ripening a week to ten days ahead of other kinds, it matures the best part of its crop while prices are at the peak which spells profit to the grower. The plants are sturdy, healthy, and long rooted, making them drought resistant. The foliage is a beautiful dark green and very abundant.

abundant.

Since first offering this excellent variety our sales on it have doubled each year and we cannot arge you too strongly to plant heavily of Premice this scason Sample (P.)—Another late variety; one of the best; large berry, good cropper, canner, and shipper.

Gandy (S.)—A reliable large, late berry; round, firm, fair quality, good shipper; the latest variety grown.

per; the latest variety grown.

Mixed Plants for a Good Crop (S. and P.)—Plants that have been mixed by mistake or are ''odds and ends'' of rows of different varieties. Couldn't make a better purchase than these.

Brandywine (S.)—To be frank, this is one of the best medium late kinds. better than Kellogg's Prize or Chesapeake; a good plant maker; berries of good quality, good size; good shippers, and a heavy bearer.

Senstor Dunlan (S.)—''Hats off to the

and a heavy bearer.

Senator Dunlap (S.)—"Hats off to the Dunlap." It is the best berry grown. Medium early to mid-season; best ounlity; heavy bearer; good plant maker; stands drouth and frost, and abuse It is the kind for everyone to set.

Uncle Jim (S.) -A very fine "classy"

Uncle Jim (S.)—A very fine "classy" berry best quality for table or near market. Liked by all. Medium to late.

Warfield (P.)—The most highly-prized of all the varieties of strawberry for canning and preserving purposes. It. like Dunlap, is standard the world over. Dark red, heavy yielder. Medium early.

Dr. Burrill (S.)—"The Million Dollar Strawberry." Claimed by the Kellogg people, of whom we secured our plants, to be better than Dunlan which it resembles, and it is a good one

Gibson (S)—Oue of the most profitable sorts for both home garden and marketing, plants very strong growers, berries extra large, choice flavor, dark glossy red. Medium.

Cooper (S)—Of this new berry we have a few plants to offer at a slightly higher rate than of others. A big rea berry that is productive, with all the other necessities that make it a profitable berry to grow.

It has a wonderful root system, is a very strong male plant. In fact we think it one of the best berries in our trial that has been introduced. Medium season.

has been introduced. Medium season.

Eaton (S.)—Another recent introduction that is becoming very popular over the country. The plant is medium large in size and is a nice clean, thrifty grow-er. Foliage has a tendency to be upright, holding the fruit from the ground, which is a desirable feature. Berries are deep red in color, conical in shape, and of great size, holding their shape and size well until the end of the season. Fruit is firm and will stand much rough handling, making it an excellent shipper. We recommend the Eaton as a valuable market or home garden variety. ket or home garden variety.

Bubach (P.)-Fruit large and hand-Bubach (P.)—Fruit large and handsome, roundish to conical, bright scarlet
in color, moderately firm, of good quatity; plant is a strong grower, with large,
healthy, dark green foliage and very productive. Requires a rich soil, inclined to
be heavy; very desirable for home use or
near market; an old stand-by and is always in demand because of its size, couproductiveness, and fine appearance;
makes the required number of plants for productiveness, and fine appearance; makes the required number of plants for a desirable row.

EVERBEARING STRAWBERRIES

The Everbearing varieties are all strong staminate and may be used to fertilize pistillate varieties.

Champion-For the past seven years the Champion bas been widely planted throughout the fruit growing centers of the country and is generally recognized as the leading Everbearer of today. The Champion bears lare quantities of medium large berries, uniformly couical in shape, and a beautiful dark red to the center. In flavor they surpass any June bearing variety and are excellent for serving fresh from the vines or for canning or preserving. The Champion is one of the first berries to ripen in the spring and the last to ripen in the fall. The first crop is borne at regular fruiting time in June. Then after a rest of three weeks the plants throw out new fruit stems and will continue blossoming and maturing fruit until freezing weather. The plants are large, healthy and vigorous. No garden should be without some of the Everbearers and any farm can add to its make the continue of the fall berry crop which sells readily at 30c to 40c a quart.

Mastodon—A recent Everbearing introthroughout the fruit growing centers of

Mastodon—A recent Everbearing introduction that we are offering this season for the first time. Many growers are very enthusiastic over this variety and claim wonderful things for it. From our own observation we have found it to be own observation we have found it to be a good producer of large red berries, but do not consider the flavor equal to the Champion. It is a strong, vigorous grower, hardy, and makes many more runners than other varieties of Everbearers. It will produce more and larger berries than the Champion and will make a good stand of new plants.

BLACKBERRIES

Eldorado—A valuable blackberry for our northern climate. The berries are large, jet black, ripen well together and are borne in large clusters; they are sweet and delicious, have no hard core, and keep well after picking. None better for any where or any purpose; 25 plants 50c; 50, \$1; 100, \$2; 250, \$4.50; 500 plants \$8; 1,000, \$16.

RED RASPBERRIES

King—Early, thrifty, heavy bearer good quality, good shipper, largely planted. 25 plants 50c; 50, \$1: 100, \$1.50; 250, \$8.25; 500, \$6.50; 1,000, \$12.

Cuthbert—Queen of the market, one of the largest; good quality, good shipper, very prolific; grows anw where: 25

plants 75c; 50, \$1.25; 100, \$2.00; 250 \$4; 500, \$8; 1,000, \$15.

\$4; 500, \$8; 1,000, \$15.

Latham Red Raspberry— This new berry originated in Minnesota, and is one of the largest grown, claimed by Minnesota Agricultural college to be tne best variety known. With us it is a very heavy yielder of large, crimson-rea berries. Growers are all pleased with it. Prices are within your reach—1,000, \$18; 500. \$10; 250, \$5.50; 100, \$2.75; 50, \$1.50; 25, \$1; 10, 50c.

Columbian Purple—A cross between

50, \$1.50; 25, \$1; 10, 50c.

Columbian Purple—A cross between the Red and Black raspberry. It takes to the nature of the red raspberry in ranes. Flavor decidedly favors the red raspberry is large. A very heavy bearer. Becoming more popular each year. We like it best of any raspberry for home use. Price—1,000, \$28; 500, \$14: 250 \$8; 100, \$3.75; 50, \$2; 25, \$1.25: 10. 75c. \$8; 100 10, 75c.

Cumberland—Black Raspberry. The best black raspberry for home use, market, and carping factory. Hardy, a heavy yielder. Price 1,000, \$20; 500, \$11; 250, \$6; 100, \$3; 50, \$2; 25, \$1.

CURRANTS AND GOOSEBERRIES

Red London Market—The heaviest bearer known; medium size, healthy bearer known; mediu bushes, largely planted.

Fays Prclific Red-Good.

Wilder-Large, red, desirable.

White Grape-White, not very sour. Prices of two year plants, each 20c; 10 for \$1.25; 25 for \$2.50; 50 for \$4; 100 for \$7.

Downing Gooseberry—Best large white. Price 2-year plants each 25c, 10 for \$2, 25 for \$3.25, 50 for \$5: 100 for \$9.

Houghton—Best red gooseberry. Price three-fifths that of Downing.

ASPARAGUS ROOTS AND SEED

No farm nor garden is complete without it, and truly it is very little trouble or expense to raise. When it comes to profit, from one to four acres will produce more net returns than the average 80-acre farm. The market has always been short of a good supply. We offer the best two large varieties only.

Webbs Improved Palmetto—2-year roots, 25 for 50c, 50 for 75c, 100 for \$1, 250 for \$2.25, 500 for \$4, 1,000 for

Palmetto Seed—Three pounds for \$2 pound for 75c, 1/2 pound 40c, 1/4 pound

wary Washington—The new grant rust-resistant. Two-year roots 25 for 75c, 50 for \$1, 100 for \$1.25, 250 for \$2.50 500 for \$5, 1,000 for \$9.

Washington 25.3

Washington Seed—5 pounds \$6, opounds \$4, one pound \$1.50, ½ pound \$5c, ¼ pound 50c.

We have millions of roots. Will make a discount an large orders. Write us.

One-year roots at 34 the price of two

GRAPEVINES

We have a large supply of fine-2-year-old vines, also one-year. If you want to set grapes in the garden or the field we can supply you at very reasonable prices. Have other varieties not listed.

A PERMANENT INCOME

Can be had by setting from one to five acres of Asparagus. The growing demand fresh for table use and the canning factories offering long term constracts has increased the demand far beyond the supmcreased the demand far beyond the supply. Incomes of \$300 to \$800 per acre are being made yearly in the PawPaw. Mich. district. It is easy to grow and keep clean, easy to harvest and the income is sure and early in the keep clean, easy to harvest and the income is sure and early in the season.
Asparagus is one of the first plants to
grow in the spring. If fruit freezes an
the better for asparagus it grows up in
a few days. We have a million roots for
sale.—Write for prices on large orders
for a permanent income. Hardy Chrysanthenums, the Thanks-giving flower— Mixed 15c each, 7 for \$1; by colors, 20c each, 6 for \$1; Golden Bell, large yellow; Snowball, the white 'mum'; Peony 'mums' pink; Fireban, red.

SEEDS

Write us about your wants in seeas as we can supply a good general line. These seeds are our own growing.

Hubbard Squash—One pound Market Gardeners strain of Hubbard Squash seed \$1, ½ lb 60c, ¼ lb 35c, 5 pounds for four dollars.

Wardwell's Kidney Wax Stringless beans, large, long golden pods, best for home use or market of the flat pods.

Stowell's Evergreen, the best late sweet corn, widely known as best for table, market, and farm use—½ lb 15c, 1 lb 20c, 5 lbs 85c, 10 lbs \$1.50

Golden Bantam—This is a sweet corn of most exquisite quality, which when ready to use is of a bright golden yeslow color. It looks rich and is rich and no mistake. It can be planted very early, as it is as hardy as the Extra Early Adams. The small stalks can grow closely together in the row and will produce 2 or 3 ears each. Price same as Evergreen.

Pencil Pod Stringless Wax, Rouna pods, very yellow, producers. A favorite on the Grand Rapids, Mich. market.

Giant Green Pod stringless; large, round green pods, fine flavor. The best green-podded bean for bome use or market.

Prices of all beans—1/2 lb 15c, 1 lb 25c, 5 lbs. \$1.10

What Are Good Plants and Trees?

A customer may have several catalogues to enouse from. Some will claim their plants are the best. It is true that usually not the largest plants, shrubs, or trees are the best, yet it is equally true that it is not the smallest plant; yet small plants many times do better than large ones. The plant with a medium size top, and well developed root system, raised on soil or fair fertility, is the best plant, as we have learned by experience. Plants grown on rich soil should not be reset on poor soil and expected to do well. Many nurscrymen grow their plants on soil too rich for the good of the buyer who sets them on medium soil. We have found, too, that plants grown under irrigation are generally poor plants for the average buyer.

we believe that, considering our experience, lifelong, in the fruit, plant, and nursery business, and our ideal soil and good care, that our plants are as good or better as any grown in Michigan or any other place. Many of our friends and customers tell us ours are the best plants they ever bought, and we have many testimonials to that effect.

Where Will You Buy?

We promise you good plants, fair prices, fair treatment, and a mutual understanding that we are constantly keeping our customers' interests in view and in caring for your interests our business is safe guarded. We trust that you will favor us with your order or at least a part of it, for which we thank you.

Very truly,

J. G. PRESTAGE & SONS.
